

Sneak Peek | Find a Provider | Online Directory Update

During the week of November 13, 2017, dental plan customers who look for an in-network dental provider are going to see a whole new site. Those who have used the previous site immediately will take note of the new format and functionality.

- **Mobile responsive** design functions like an app, so your customers can use it wherever they go. Mobile view shown at right.
- **Intuitive and interactive**, the most cost-effective providers are displayed first and in green, based on the search criteria. Then users can compare providers for the best fit.
- **Full-color map** shows where providers are located. Just click the push-pin icon for up to three providers, and they will appear on the map.
- **Scroll functionality** allows users to easily scroll down to see more providers, instead of having to go back and forth between pages.

We at Ameritas hope you and your dental plan customers find the new site easy on the eyes, and easy to use.

If you or your dental plan customers experience any difficulties, contact our customer connections team at 800-487-5553. Thank you!
