We Believe In You

We believe in the value of regular dental care, and we share this sentiment with our customers. To help get insured patients into your practice, our plans cover one or two preventive visits each year. In addition, we offer a benefit carryover feature to employers that requires their insured employees to visit the dentist at least once a year. There's also a feature where preventive visits do not reduce the annual maximum benefit, so insureds have more benefit dollars to spend in your office.

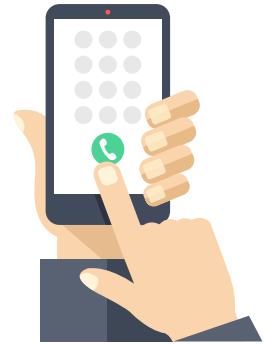

Dentistry is your area of expertise, and dental benefits are ours. We can help you submit claims, answer your questions, and assist you with accessing your provider rewards discounts, so you have time to do what you do best.

Our dental network turnover rate has stayed at 3% or less for more than a decade, which consistently beats the industry standard of 10%. Consider taking a closer look, and experience our personal service firsthand.
