

iHear Offers True Value

How iHear compares to traditional hearing aids.

Life can change dramatically when your hearing starts to decline. There is no way to reverse hearing loss, but hearing devices can help you continue to lead a fulfilling life. And it doesn't have to break the bank. iHear products are an affordable option to help with your hearing health.

Why choose **iHear hearing aids**?

*Average price of a programmable hearing aid in 2016.

Hearing Test

The iHearTest kit is the first over-the-counter hearing loss testing device to be approved by the FDA. This convenient, online test creates a profile of your hearing ability.

The Professional Programming Service, free with your device purchase, customizes the settings on your hearing aid with either your iHearTest or audiogram results before your device is shipped.

Hearing Aid Devices

iHear hearing aids feature advanced digital audio processing and adaptive feedback cancellation for optimal hearing in any environment. Since iHear makes their high-tech devices in the USA, there is no mark-up from outside manufacturers, which saves you money. And iHear is so small, it's practically invisible!

iHear Advantages

1. Convenient to order
2. Less expensive than other hearing devices
3. Advanced technology yet smaller than other devices
